The ETA 2500 family of movements was produced in the 1960s-1970s. The calibers from the 2500 series are considered to be predecessors to the ubiquitous ETA caliber 2824-2 framework that most watch enthusiasts are familiar with ...

The Rolex's higher winding efficiency and longer power reserve is noticed immediately compared to the 2892. (esp. for us collectors, who will often take the watch off for a day or two, then coming back to it because it is still running and correct) ... That movement disadvantages of a regulated system, as well as the disadvantages of the free ...

Height on movement 4.10 mm Power reserve Number of rubies Frequency 44 h 27 4 Hz (28"800 A/h) 48 h 27 3.5 Hz (25"200 A/h) CALIBRE 2500 Automatic movement, Co-Axial escapement, date, COSC-certified, Omega balance system without index. Hour, minute and ...

The Omega Calibre 2500 automatic movement has also received praise for its reliability and accuracy. Watch enthusiasts have noted that the movement is a testament to Omega's commitment to quality and precision. The 48-hour power reserve has also been noted as a useful feature for those who wear the watch regularly.
