What is a gcpv solar PV system?

Stand-alone solar PV systems are extensively used to provide electricity in dispersed islands and rural areas throughout the region. Now, GCPV systems are slowly being introduced across the cities and towns in many PICs and a number of feasibility studies are underway for potential installations.

Why are solar PV systems gaining attention in the Pacific region?

PV systems are gaining much attention in the Pacific region where governments, development agencies and private investors are promoting the use of PV for electricity generation. Stand-alone solar PV systems are extensively used to provide electricity in dispersed islands and rural areas throughout the region.

How much does a solar project cost in Pohnpei?

After just 15 years, the entire project, capitalized at over \$20 million, will transfer, without cost, to the State of Pohnpei, providing it with many more years of free renewable energy using the best solar technology. The solar project in Pohnpei is a concept that can be replicated by other Small Island Developing States.

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce emissions. On the ...
