**4 UTILITY SCALE BATTERY ENERGY STORAGE SYSTEM (BESS) BESS DESIGN IEC - 4.0 MWH SYSTEM DESIGN** This documentation provides a Reference Architecture for power distribution and conversion - and energy and assets monitoring - for a utility-scale battery energy storage system (BESS). It is intended to be used together with

The company has over 140 years of history and more than 105,000 employees worldwide. ABB's shares are listed on the SIX Swiss Exchange (ABBN) and Nasdaq Stockholm (ABB). ABB Electrification is a global technology leader making efficient and reliable use of electricity from source to socket possible.

**Disconnect switches in Energy Storage Systems** Disconnect switches can be used in three different levels of an Energy Storage System (ESS): battery racks, combiners and Power Conversion Systems (PCS). The most suitable switch to use depends on the size of the ESS, and whether the topology is behind or in front of the meter.

A disconnect function, overcurrent protection and interfaced protection are required since the PCS is connected directly to a utility line in the majority of cases. The PCS can be supplied with ...

**Energy Storage System (BESS) requirements.** ... ABB provides equipment to convert DC power into AC power, that can be connected directly to the utility power grid. Simply put, the DC battery ... fused manual disconnect switch or vacuum circuit breaker suitably rated for the incoming line voltage. Primary current

energy storage unit does not belong to the converter unit delivery. The customer (or the system integrator) must equip the DC/DC converter with a suitable energy storage system. For more details on energy storage units, please contact the manufacturers of those systems. Even though a range of options and solutions is
