

Does Armenia have solar energy?

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh), and one-quarter of the country's territory is endowed with solar energy resources of 1 850 kWh/m<sup>2</sup> per year. Solar thermal energy is therefore developing rapidly in Armenia.

What is Armenia's energy mix in 2022?

Products 22.6% (0.73 mln toe). Armenia exports electricity in 2022, of which by 0.79 nuclear power plant (31.0%), natural gas fired thermal power plants (42.2%), hydro power plants (21.1%) and wind and solar 0.68 plants (5.7%). Although Armenia's energy mix is dominated by gas, the electricity mix is well diversified in comparison

How much energy does Armenia need?

It has been an observer to the Energy Community since 2011 and a member of the Eastern Partnership since 2009. Although Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020) and the country does not produce any fossil fuels, it manages to cover 27% of energy demand with domestic energy production.

What are the different types of energy sources in Armenia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Armenia: How much of the country's energy comes from nuclear power?

Does Armenia trade electricity with Georgia?

Armenia also trades electricity with Georgia, though volumes are low since the countries' networks are not synchronised. Energy interconnections with Azerbaijan and Turkey are currently inactive for political reasons. Prompted by a severe electricity supply crisis in the mid-1990s, Armenia has revamped its energy sector over the past 20 years.

Where does Armenia get its energy from?

Lacking indigenous resources, Armenia imports natural gas and oil for most of its energy needs (78.6% of total energy supply in 2020), mainly from the Russian Federation (hereafter, "Russia").

Armenia's energy sector has been significantly shaped by its geographical and geopolitical circumstances. With no significant fossil fuel reserves, the country heavily relies on energy ...

Electric energy is one of the most developed areas in the economy of Armenia. There are both the traditional

sources for electricity production that are NPP, TPP and HPPs, and the alternative ...

Armenia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh), and one-quarter of ...
