

Where is the battery pack located?

Depending on the type of device, the battery pack may be located inside the main cabinet or in an external battery casing. The CBS system can be flexibly adapted to each facility by diversifying the power supply to fire zones or the methods of routing emergency lighting circuits by using appropriate CBS systems with PBS substations.

What is a central battery system?

Central battery system provides power supply to the DES luminaires during malfunction due to the use of battery sets. The central battery system has an internal charger which controls charging process and switching of operation mode. The DES system cooperates with the CBS central battery system.

Are AWEX systems complied with European standards?

All AWEX systems are manufactured in compliance with applicable European standards. The RUBIC UNA is the latest and the most advanced monitoring system designed to control independent luminaires of emergency and escape route lighting systems. It is designed to be used in medium-to-large facilities and buildings.

How can a control panel system be flexibly adapted to a facility?

The devices can be flexibly adapted to each facility by diversifying the power supply to fire zones. Additionally, taking care of the safety of rescue teams, all control panel systems can be forced to work in IT mode, both from the level of the cabinet and by an external signal. See our central battery systems.

Who is AWEX?

Awex brand has been existing in the emergency lighting sector since 2002, invariably fulfilling its clearly defined mission: top-quality state-of-the-art products and customer satisfaction. We offer the full range of emergency lighting devices in compliance with all the European standards.

How does AWEX smart work?

In order to eliminate such inconveniences, AWEX has introduced a new fully automatic technology to monitor and control each luminaire in a circuit. The SMART enables installation of luminaires operating in three different modes: continuous, intermittent and switched, in a single circuit.

Features:

- o Charging the battery packs in accordance with PN-EN 50-171
- o Operation with and control of BST-980 charge boosters
- o Monitoring of current leakage in final circuits
- o Protection against deep discharge
- o Ability to monitor ...

The LPS central battery system, offered by AWEX, is a small, up-to-date, reliable and simple device. It has been designed in accordance with the applicable standards and with using SMART technology.
