

Which type of solar cells generate the most power in Bangladesh?

Mono Perc cells have the highest efficiency in generating power among the four types of solar cells available in the market. With this, the share of renewable energy in Bangladesh's total power generation capacity reaches 907.24MW, whereas the total generation capacity is above 25,000MW.

Who owns Energon renewables?

Energon Renewables, a subsidiary of the industrial conglomerate Orion Group, has built the plant on a 350-acre site that had originally been developed for a coal power project in 2014. The Orion Group shelved the coal project and struck a deal with the Bangladesh Power Development Board (BPDB) in February 2019 on building the solar park.

What is Bangladesh's largest solar plant?

The solar plant is a milestone in Bangladesh's efforts to reduce emissions as Prime Minister Sheikh Hasina at the COP26 announced a "target of generating 40% of our energy from renewable sources by 2041". The largest solar plant in the country, built on a 350-acre site. Photo: Courtesy

When will the country's largest solar park in Mongla start supplying electricity?

The country's largest solar park in Mongla is all set to begin supplying 134.3 megawatts peak (solar power measuring unit) of electricity to the national grid from 25 December.
