

Battery storage system for home Saint Helena

Should I buy a solar battery storage system?

Being able to store solar energy has come a long way in recent years. With dozens of systems available, we will assess your needs and calculate a suitable system and size for you. One size certainly does not fit all. If you already use all the solar energy you make, spending money on battery storage systems will be of no benefit.

What is a battery storage system?

We call it Living the lithium lifestyle. Battery Storage Systems allow you to use the extra energy when you need it most. Battery storage systems come in many sizes so we can tailor the system to suit your individual needs. An example would be someone who has only got room for 8 panels (2kwp) doesn't need a large battery bank.

Can a battery storage system 'live the lithium lifestyle'?

You can even 'smart-charge' battery systems so in the winter when solar gain is low, you can top up at cheap rate overnight from the grid and discharge during the day. We call it Living the lithium lifestyle. Battery Storage Systems allow you to use the extra energy when you need it most.

Which solar PV battery storage options do you offer?

Sometimes our customers are looking for solar PV battery storage with less capacity,or bespoke,with increased UPS capability. As well as Tesla,we offer customised Victron based systems(ideal for off-grid),with a range of batteries including BYD,SimpliPhi,and GivEnergy. Generate over 70% of your electricity using solar PV and battery storage.

Why are home battery storage systems so popular?

Home battery storage systems have skyrocketed in popularity during the past few years for many different reasons. Besides the obvious fact that they provide clean power,more and more people are recognizing that the grid isn't always reliable.

Can a solar panel system run without a battery storage system?

Ceder says one important thing to remember is that if you have a solar panel system without a battery storage system,you won't have power if there's an outage. That's because most solar panels will shut down during outages,so power isn't sent onto lines while utility workers are trying to repair them.
