Green Genius is developing renewable energy (solar and biogas) projects in 6 European markets: Lithuania, Poland, Ukraine, Belarus, Spain and Italy. The company is also actively looking for opportunities to expand in other Central European countries.

Belarus has the potential to transition to more environment-friendly industries. To achieve this, it has to increase energy efficiency, adopt clean technologies, develop a circular economy, efficiently use resources, and manage waste.

The development of a green economy in Belarus is artificially constrained by a de facto moratorium on the development of renewable energy sources, ineffective emission reduction policies, investments in non-environmental projects, and underdeveloped green
