

Does Enphase support home assistant?

While Enphase doesn't officially support Home Assistant, there is a great integration built into the core that is relatively well maintained. Over the following sections, we will walk you through the process of connecting your Enphase power system to Home Assistant. We will also show you how to add Enphase to the Home Assistant energy dashboard.

How to integrate Enphase envoy with home assistant?

To begin the integration process, change to the " Settings " screen using the sidebar. 2. Once you are on the settings page, click the " Devices & services " option. 3. Home Assistant will automatically detect your Enphase Envoy system as long as it is on the same network.

Which Enphase sensor works with energy dashboard?

For 'Solar Production', the `today_s_ENERGY_production` sensor is the ONLY enphase sensor that will work with energy dashboard by default without modifying home assistant and creating extra power and energy sensors. This is due to the `state_class: total_increasing` attribute that ONLY this sensor appears to have.

How long does Enphase data take to show up?

31. With all your Enphase data now being piped into the Home Assistant Energy dashboard, you will have to wait two hours before anything is displayed. Below, you can see what this data might start to look like as Home Assistant aggregates all of the data.

How do I configure Enphase envoy?

For firmware before 7.0, with username installer, leave blank. Options for Enphase Envoy can be set via the user interface, by taking the following steps: Browse to your Home Assistant instance. Go to Settings > Devices & Services. If multiple instances of Enphase Envoy are configured, choose the instance you want to configure.

Can home assistant use Enphase battery charge & discharge power?

Our two helpers now give Home Assistant the Enphase battery charge and discharge power. However, to be usable within the Energy Dashboard, we must convert these values from power to energy. Energy is essentially a way of expressing your power over a period of time.

Hi Ron, Your Power Dashboard looks ok to me, however from your first ESPHome screenshot, something isn't right in your setup as the sensor for "House - Power Consumption" is 0W while the other two Energy Sensors ...

For example, at this very moment, it's a bit cloudy outside, and my solar is only producing 2.9kW, and that's

accurately reflected in the Enphase app as well as in Home Assistant. Then when I look at my consumption in the ...

Home Assistant Energy Dashboard with Enphase Envoy and Emporia Vue. I don't have CTs installed, so my Enphase app just shows solar production. I posted this post and it got a fair bit of attention asking for writeups, so here's my attempt ...

<p>Enphase has talked about being the Apple of solar in the past, but they didn't learn from Apple on integration. Even Apple, Google, and Amazon have decided to just support a single ...

Energy Dashboard updates once every hour. Enphase enlighten cloud updates every 15 mins. Your sensors in home assistant update every minute if using the native enphase integration. I use the sensors to create ...
