

Bermuda has a high solar potential and set a renewable energy mix target of 38% by 2035. Presently Bermuda's energy mix is comprised of little renewable energy on the public grid. Its electrical demand peaks at 110MW and its electricity prices are on ...

This project is a significant achievement for Saturn Power, BELCO, the government and the people of Bermuda, as it is the country's first utility-scale, renewable energy facility. Using over 20,000 photovoltaic solar panels, Saturn Power developed this 6 MW AC solar photovoltaic (PV) power generation facility, at "The Finger" on St. David ...

Power up your Bermudian paradise with BE Solar: Bermuda's leading energy solutions provider, empowers you to embrace clean, sustainable power. We expertly design, sell, and install premium solar panels, reliable batteries, and cutting-edge EV ...

Bermuda's first Utility Scale Solar power facility, located on "The Finger" at the L.F. Wade International Airport in St. George's, has begun producing energy to Bermuda's energy grid, marking a historic occasion for the island nation.

Problems linked to the Covid-19 pandemic delayed the completion of the island's first large-scale solar farm, the Minister of Home Affairs said yesterday. Walter Roban added that he was ...
