

# Bess project Bosnia and Herzegovina

How many Bess systems will be deployed in 2027?

The 5GW of BESS systems are expected to be deployed by the end of 2027. Credit: r.classen/Shutterstock.com. A total of 11 countries, including India, Egypt and Kenya have joined the battery energy storage systems (BESS) consortium at the 2023 United Nations Climate Change Conference (COP28), being held in Dubai, UAE.

Where did SSE get the Bess project?

The BESS project has been obtained from Grid Systems Services, a subsidiary of Low Carbon. SSE's 50MW battery storage asset at Salisbury in Wiltshire, England, which entered commercial operation in April 2024. Credit: SSE Renewables.

What is the Bess consortium?

The BESS Consortium is a multi-stakeholder partnership set up to ensure these BESS benefits transform energy systems across low- and middle-income countries (LMICs). The Consortium is on track to meet its target of securing 5 GW of BESS commitments by the end of 2024 and deploying these by the end of 2027.

Which countries have joined the Bess consortium at the 2023 cop28?

Eleven countries, including India, Egypt, and Kenya, have joined the BESS Consortium at the 2023 COP28, being held in Dubai.

How can a Bess consortium benefit low-income countries?

Renewable sources of energy with a combination of BESS are cheaper than fossil fuel power plants. As a multi-stakeholder partnership, the BESS consortium can bring the benefits of energy storage to low and middle-income countries.

What is Bess & why is it important?

BESS is a critical element in the deployment of renewable energy sources that are intermittent, such as sunshine, and can help increase grid reliability. How well do you really know your competitors?
