Will the World Bank support a solar photovoltaic plant in Uzbekistan?

Image for representation purposes only. The World Bank on Tuesday (May 21) announced that it will support a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS) in Uzbekistan -- Central Asia's first renewable energy facility with a utility-scale battery storage component.

Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 -- The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

Where is Bess project located in Tashkent?

The PV plant and the BESS facility are situated 3.5 km apart, within Yuqorichirchik District and Parkent District respectively. Both districts are located within Tashkent Region. The overall project location lies about 20 km from Tashkent City.

What are the main components of Bess project?

The Project consists of two main components, namely the Photo-Voltaic (PV) power station and the Battery Energy Storage System (BESS). The PV plant and the BESS facility are situated 3.5 km apart, within Yuqorichirchik District and Parkent District respectively. Both districts are located within Tashkent Region.

What is a Bess project?

The project aims to expand clean and reliable electricity access to approximately 75,000 households. The project marks Central Asia's first renewable energy initiative with an integrated BESS component.

What does Bess stand for?

The Project will also involve the establishment of a 500 MWh AC-coupled Battery Energy Storage System (BESS). The BESS will operate on an independent basis (separately from the PV plant) and be developed close to the existing sub-station. The BESS facility will serve the following main functions:

%PDF-1.6 %âãÏÓ 989 0 obj > endobj 997 0 obj >/Filter/FlateDecode/ID[]/Index[989 15]/Info 988 0 R/Length 58/Prev 1969798/Root 990 0 R/Size 1004/Type/XRef/W[1 2 1 ...

According to EDF Renewables, the 100MWh battery system will help support the integration of renewable energy by storing it for when there is a peak in demand. The lithium-ion battery system will be directly connected to ...

The project marks Central Asia's first renewable energy initiative with an integrated BESS component, which
