Targets and subsidies are translating into project development and power market reforms that favor energy storage. Our increase in deployments is driven by a wave of new projects prompted by energy shifting needs. Markets are increasingly seeking energy storage for capacity services (including through capacity markets).

The hosts of this year's global climate talks will ask over 190 countries to back a Group of Seven target to increase global energy-storage capacity more than sixfold by 2030. The draft ...

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible scenarios covering electricity, industry, buildings and transport, and the key drivers shaping these sectors until 2050.

Energy storage hit another record year in 2022, adding 16 gigawatts/35 gigawatt-hours of capacity, up 68% from 2021. Beyond record additions, several markets announced ambitious energy storage targets totaling more than 130GW by 2030, although BloombergNEF remains cautious on its impact on forecast demand given the lack of policy ...

The global energy storage market is set for another record year. BloombergNEF expects 69GW/169GWh of additions in 2024, up 76% in gigawatt-hours from 2023. China continues to lead installations thanks to provincial co-location mandates, but a slight...

According to IEA and BloombergNEF, battery storage was the most invested-in energy tech, with biggest-ever growth in deployments recorded. "Big expansion" in battery manufacturing essential to global net zero goals, BloombergNEF says

The global energy storage market is growing faster than ever. Deployments in 2023 came in at 44GW/96GWh, a nearly threefold increase from a year ago and the largest year-on-year jump on record. BloombergNEF expects 67GW/155GWh will be added in 2024,...

The hosts of this year's global climate talks will ask over 190 countries to back a Group of Seven target to increase global energy-storage capacity more than sixfold by 2030. The draft proposal seen by Bloomberg,

Bloomberg energy storage Norfolk Island

called the Global Green Energy Storage Pledge, will be presented at the COP29 summit in Baku, Azerbaijan, in November.
