How do you charge a PowerWall with a BMS?

Attach the BMS with its balance leads and connect the inverter using thick wires to handle the load. Configure and connect the charge controller to safely charge the powerwall. Finally, wrap and secure the battery pack, ensuring all components are properly connected and tested.

What are the large wires on a BMS board?

The large wires are the in and out for the negative connection of the battery. Because BMS boards are N-channel devices, you don't have to attach the positive line anywhere on the BMS. Instead, the positive goes straight from the battery pack to the connector or load.
