

What is Bolivia's energy mix?

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. In 2021, Bolivia's national electricity agency ENDE announced its intention to generate up to 80% of the country's power from renewable sources by 2025.

How much energy does Bolivia use?

Total energy consumption in 2020 in Bolivia was of 43 kboe, of which shares were 24.2% for Diesel (DS), 22.0% for NG, 29.4% for gasoline and other fuels / Heavy Fuels (HF), 12.4% for Biomass (BM) and 12% for electricity (EL).

Which companies make electricity in Bolivia?

These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent). The best sales prospects are with hydrocarbons: natural gas-related machinery, equipment, and production.

Which sector consumes the most energy in Bolivia?

When expressed by sectors, the transport sector is the main energy consumer in Bolivia with a share of 49.0%, followed by industry 25.3%, residential 17.3%, commerce and services 3.8%. Total 3318.8 MW installed capacity.

Does Bolivia have a long-term energy plan?

As previously mentioned, the Bolivian government does not provide any long-term energy planning study, however, the UNFCCC (2015b) states that RE will compose 81% of electricity generation by 2030. Bolivia's scenario for 2027 according to MHE (2009) states that biomass sources will comprise 8% of total final energy demand.

What is the primary source of energy for Bolivia?

The primary source of energy for Bolivia from this study is solar PV. Such high shares of solar PV in Bolivia are supported by solar resource findings in Breyer and Schmid (2010), which determined Bolivia to be among the ten countries with the maximum solar irradiation for fixed optimally tilted PV systems.

Total energy consumption in 2020 in Bolivia was of 43 kboe, of which shares were 24.2% for Diesel (DS), 22.0% for NG, 29.4% for gasoline and other fuels / Heavy Fuels (HF), 12.4% for ...

Bolivia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key ...
