

Bright energy Bouvet Island

Where is Bouvet Island?

Welcome to Bouvet Island, a small volcanic rock in the South Atlantic. The Sub-Antarctic territory is thousands of kilometres from civilisation, and its high cliffs and ice-cap mean very few people have ever put a foot on it. The weather doesn't help. Sticking out of the ocean the way it does means conditions can deteriorate very fast.

How remote is Bouvet Island?

To understand how remote this island is, let's take a look at what's around it. The closest land to Bouvet Island is Queen Maud Land, in Antarctica, located 1,700 km to the south.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south, 58 and Gough Island, 1,845 km (1,146 mi) to the north.

Does Bouvet Island have a cold climate?

Bouvet Island lies south of the Antarctic Convergence, a marine belt that encircles Antarctica and marks the point where the cold Antarctic waters meet the warmer waters of the surrounding oceans. Thus, Bouvet Island has an Antarctic climate, with cold temperatures all year round and little fluctuation.

How did Bouvet Island get its name?

At that point, the island was given its current name of Bouvet Island ('Bouvet's' in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency. In 1971, it was designated a nature reserve.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.
