

As the world's climate changes, plants and animals have adapted by expanding into new territory and even shifting their breeding seasons. Now, research suggests that over the past 75 years, flowers have also adapted to rising temperatures and declining ozone by altering ultraviolet (UV) pigments in their petals.

Britské indickooceánské území (anglicky British Indian Ocean Territory) má status zámo?ského území Spojeného království Velké Británie a Severního Irska.. Je to skupina ostrov? na západ?
