

# Cabo Verde energy business

Does Cabo Verde have electricity?

Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar. Although 93 percent of the population has access to electricity, there are significant losses in the distribution grids, and electricity costs are extremely high.

What percentage of Cabo Verde's energy comes from imported petroleum products?

Includes a market overview and trade data. Imported petroleum products constitute about 80 percent of Cabo Verde's total energy supply, while less than 20 percent comes from renewable sources, primarily wind and solar.

What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.

Is Cabo Verde a good place to start a business?

However, small- or medium-sized U.S. companies may find business opportunities in Cabo Verde that also serve as a launching pad into the regional market. Cabo Verde's physical (airports, ports, roads, hotels) and IT infrastructure are generally of high quality. There are local entities responsible for supporting foreign investments and businesses.

Does Cabo Verde have a wind farm?

Wind: Cabo Verde has relevant experience in the sector, including through a public-private partnership called Cabeolica. Energy generated by wind turbines feeds the national grid on several islands. Cabo Verde offers good and reliable wind resources (18m/s).

Is Cabo Verde part of power Africa?

Cabo Verde has been included in a number of regional projects as described in the Power Africa Toolbox. Power Africa is a market-driven, U.S. government-led public-private partnership aiming to double access to electricity in sub-Saharan Africa.
