

Carrington energy Tanzania

What is Carrington Power Station?

In 2017 we were proud to open Carrington Power Station. Powering more than 1 million homes and businesses in the Greater Manchester area, the gas fired power station is one of the most efficient thermal plants in the UK and has the ability to allow renewables like wind and solar on its system at any given time.

What makes Carrington a good power station?

Power stations like Carrington complement low carbon wind and solar renewable energy by providing reliable electricity all year round, whatever the weather or time of day. For nearly 30 years, we've been right here in Britain, pushing the boundaries of what great energy looks like by investing invaluable time and infrastructure into greener energy.

Is biomass a source of electricity in Tanzania?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Tanzania: How much of the country's electricity comes from nuclear power?
