

Christmas Island grid modernization initiative

What is the Grid Modernization Initiative (GMI)?

The Grid Modernization Initiative (GMI) works across the U.S. Department of Energy (DOE) to create the modern grid of the future. Our extensive, reliable power grid has fueled the nation's growth since the early 1900s; however, the grid we have today does not have the attributes necessary to meet the demands of the 21st century and beyond.

Why should we modernize our power grid?

Modernizing the nation's power grid to accommodate more clean energy resources while being resilient, reliable, and secure in the face of increasing extreme events and man-made threats is critical to our national security and economic prosperity.

What is the energy grid modernization Lab consortium?

A collaboration among 5 research institutions has been established through the U.S. Department of Energy Grid Modernization Lab Consortium to provide technical assistance to the 7 U.S. Independent System Operators and Regional Transmission Organizations. Foundational Projects and Technical Area Portfolio Review
