The mini grids will utilize solar energy, diesel generator and battery energy storage system, tailored specifically to the unique geographic and climatic conditions of Chuuk. This innovative approach will reduce dependency on fossil fuels, mitigate carbon emissions, and pave the way for a greener future for the region.

A new partnership between the European Union (EU), the Pacific Community (SPC) and the Government of the Federated States of Micronesia (FSM) signed today, will ensure communities across FSM particularly the state of Chuuk have improved access to affordable, reliable and environmentally sound energy services into the future.

The Renewable Energy and Energy Efficiency in the Federated States of Micronesia project contributes to the FSM's Energy Master Plan focused on rapidly boosting access to energy for its peoples whilst reducing the reliance on fossil fuel imports to drive energy supply.

The President of the Federated States of Micronesia officially launched a large-scale sustainable energy project focused on increasing access to energy for citizens across FSM whilst reducing the country's reliance on fossil fuels for energy generation.

In Micronesia, streetlighting is improving safety & security across the island. The more efficient & cheaper streetlights will allow residents to walk home safely at night, enable local businesses to operate longer, & make driving at night safer.

City energy solutions ltd Micronesia

City Energy continues producing and distributing piped town gas safely and reliably to more than 870,000 residents, commercial and industrial customers islandwide, while offering low-carbon home solutions and electric vehicle charging services through its sub-brands, City Energy Life and City Energy Go respectively.

This profile provides a snapshot of the energy landscape of the Federated States of Micronesia (FSM), a sovereign nation and U.S.-associated state in the western Pacific Ocean. The FSM is made up of more than 600 islands, which presents a significant challenge of delivering electricity to people living on outer islands.
