

Founded in 2010 in Lesotho, Mos-Sun Clean Energy Technology (MOSCET) specializes in renewable energy technologies, aiming to advance sustainable solutions and provide electricity access in underserved areas in Lesotho and in the broader region of Southern Africa.

The overall objective of Phase I is improved access for the people of Lesotho and the private sector to modern, clean, affordable and reliable energy supply, including better enabling environment for large up-scaling under a follow-up phase II, which will be focusing on energy access for the rural areas and energy efficiency improvement in ...

Lesotho Energy Policy 2015-2025 is a framework policy that sets out the strategic direction of the country's energy sector developments. It is aligned to the Vision 2020 and the NSDP and promotes development of environmentally cleaner renewable energy and increasing its share in the country's energy mix.

This Lesotho Energy Policy 2015-2025 is made with the vision that energy shall be universally accessible and affordable in a sustainable manner, with minimal negative impact on the environment. The Policy is aimed at contributing towards the improvement of livelihoods, contributing towards economic growth and investment, ensuring security of ...

progress of Lesotho energy sector on the four targets of SDG7: energy access (electricity and technologies for clean cooking), renewable energy and energy efficiency. The study further ...

Because it costs much less to save energy (through energy efficiency system upgrades) than is required to build new power plants (whether fossil-based or renewable), improving the energy ...

This Lesotho Energy Policy 2015-2025 is made with the vision that energy shall be universally accessible and affordable in a sustainable manner, with minimal negative impact on the ...

transition to a low-carbon energy sector and simultaneously address energy access challenges. To address this issue, Lesotho's Energy Policy 2015-2025 calls for the increased private ...

The objective is to enhance the readiness of Lesotho's private sector to develop, commercialize, and invest in climate and clean energy (cleantech) solutions, as well as to maximize the economic growth opportunities embedded therein, while supporting Lesotho in reaching its Nationally Determined Contribution (NDC) targets.

A joint initiative to increase clean energy generation and energy efficiency in the Mountain Kingdom, Renewable Lesotho promotes reliable and equitable access to energy, while improving energy sector
