

The World Bank Group has released information on the Comoros Solar Energy Access Project (CSEAP), whose four components include 9MW of solar PV and 19MWh of battery storage. It replaces an earlier project cancelled last year by the WBG.

The Comoros Solar Energy Access Project is set to revolutionize the energy infrastructure of the Comoros by integrating solar power with advanced storage solutions. The project includes the construction of solar power plants on the islands of ...

In a significant stride toward sustainable energy, the Union of the Comoros announces a revised call for expressions of interest for the Comoros Solar Energy Access Project (PAESC). Financed by the World Bank, this initiative aims to bring reliable and eco-friendly electricity to the nation.

The forest zones of the Comoros are threatened by anthropic pressures and the vegetation has been threatened by tree felling and bush fires. Humans are transforming all vegetation for the benefit of food and food productions.

Today, electricity production in the Comoros is mainly based on hydrocarbon generators. In addition to using fossil fuels, this system is not enough to power the country, where the rate of access to electricity does not exceed 50%.
