What are vertical storage solutions?

Vertical storage solutions are the best way to make use of every inch of warehouse space you have. We don't mean building out, we mean building up. With products like Vertical Lift Modules and automated storage and retrieval systems (ASRS) from our partners at Modula, we are able to recover up to an incredible 90% of the currently used floor space.

What is vertical storage USA?

Vertical Storage USA Vertical Storage USA specializes in vertical storage solutions, with a particular emphasis on Vertical Lift Modules. They position these systems as a cost-effective alternative to warehouse expansion. Space optimization: VLMs maximize vertical space usage, potentially eliminating the need for costly warehouse expansions.

How can a vertical carousel storage system improve picking productivity?

If you're looking for a way to optimize your parts storage, save space, and improve picking productivity, a vertical carousel storage system can help. The vertical carousel utilizes overhead vertical space to store more parts in a compact footprint, and its ergonomic design helps pickers work quickly and efficiently.

What is a vertical carousel storage system?

Vertical carousel storage systems maximize picking productivity by using the goods-to-person principle. Operators no longer have to spend time walking and looking for the parts they need. Instead, all parts are stored in a compact footprint and delivered directly to the workstation at the push of a button, eliminating search time.

Can a vertical warehouse storage system disrupt operations?

Implementation challenges: Transitioning to new vertical storage systems could temporarily disrupt operations. Conveyco appears to offer a wide range of vertical warehouse storage solutions that can significantly improve space utilization, efficiency, and safety in warehouse operations.

What are the benefits of a vertical storage company?

Space optimization: Their focus on vertical storage helps businesses maximize warehouse space utilization without expanding facilities. Customization: They emphasize tailoring solutions to specific business needs, considering factors like inventory characteristics and order profiles.

Vertical Lift Modules (VLM) are the highest quality vertical storage and retrieval solutions in the world, specifically created with space optimization and warehouse improvement in mind. With these systems, you'll be able to store up to 2,000 lbs. of equipment per tray, a total of over 150,000 lbs of equipment per system.

With Modula vertical storage solutions, companies can quickly see a return on investment as fast as 6 months

Comoros vertical storage system

depending on the overall size of the project. Moreover, the Modula unit can be delivered, installed and loaded within an average of 8 weeks, from the order to the moment your Modula is operational.
