

Why should you attend solar solutions Düsseldorf 2024?

This cooperation not only offers an expansion of the subject areas that you can discover at the exhibition. It also expands your networking opportunities: even more experts and potential business partners from the North Rhine-Westphalia region are now drawn to the exhibition halls of Solar Solutions Düsseldorf 2024.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.
