Is Bahrain transitioning to solar energy projects?

After the establishment of the Sustainable Energy Unit (SEU) in Bahrain in 2014, a radical transition toward launching solar energy projects can clearly be observed. The SEU was established in collaboration between the national government and the United Nations Development Program (UNDP).

Are Bahrainis willing to pay the full cost of solar PV systems?

According to the cross tabulation results, majority of participants who were willing to pay the full cost of residential solar PV systems were Bachelor degree holders with the average per-capita monthly income for Bahrainis.

Is Bahrain's first solar panel company the start of a sea change?

This is good news for Solar One, Bahrain's first solar panels company. Since its founding in 2017, the startup boasts of contributing over two megawatts of solar to the country's energy mix -- enough to power around 380 US homes. It's a drop in the ocean, but it hopefully marks the beginning of a sea change.

How much does electricity cost in Bahrain?

The price of electricity in Bahrain is 0.048 U.S. Dollar per kWh for households and 0.077 U.S. Dollar for businesses (March 2023), including all components of the electricity bill such as the cost of power, distribution, and taxes.

Why are there no barriers to solar PV installation in Bahrain?

None of the participants mentioned any reported barriers to installation of solar PV in Bahrain. This is likely because solar panel installation is relatively new in Bahrain and the participants were not clear on the specifics involved. Effective dissemination of information is necessary, as explained later.
