

# Datasafe battery Ecuador

What is a datasafe HX 12V battery?

EnerSys UPS Batteries, DataSafe HX 12V, are valve regulated lead acid batteries that have been designed to offer superior solutions for the UPS, IT and Telecom (select models) markets which demand the highest levels of security and reliability. DataSafe HX top terminal batteries are the ideal source of power to protect vital systems.

What is a datasafe DX battery?

The DataSafe® DX range of flooded lead-calcium flat plate batteries has been designed for use in UPS applications, more specifically large data centers, which demand the highest levels of security and reliability. The reliability of DataSafe DX as a leading high rate performance battery is backed by 20+ years of experience in the marketplace.

What is a datasafe HX top terminal battery?

DataSafe HX top terminal batteries are the ideal source of power to protect vital systems. DataSafe HX top terminal batteries incorporate select design features that maximize reliability while ensuring superior performance and an excellent service life.

Is datasafe HX 12hx540 battery safe?

This battery meets UL safety standards and is approved by the International Air Transport Authority (IATA). It is classified a high-performance model. The DataSafe HX 12HX540 features AGM VRLA (Absorbed Glass Mat Valve Regulated Lead Acid) technology and optimized electrochemistry.

How long does a datasafe 12hx300 battery last?

With a design life of 10 years, the DataSafe 12HX300 top terminated battery has several important components, including individual flame-arresting cell vents; high-performance, brass-threaded terminals (faston and bolt); a brass-threaded receptacle; and positively and negatively charged lead-calcium-tin alloy plate grids.

What is datasafe 12hx300?

EnerSys created the DataSafe 12HX300 for low-ventilation, high-rate applications, and vital systems. This unique battery combines the power of 12V with a low level of gas evolution, earning its approval for air freight applications.

The DataSafe HX 12HX540 is the most powerful model in EnerSys' HX line of UPS batteries. It exhibits minimal gas evolution makes it a popular choice for low-ventilation, high-rate applications and vital systems. This battery meets UL ...

The DataSafe HX 12HX540 is the most powerful model in EnerSys' HX line of UPS batteries. It exhibits minimal gas evolution makes it a popular choice for low-ventilation, high-rate applications and vital systems.

## Datasafe battery Ecuador

This battery meets UL safety standards and is approved by the International Air Transport Authority (IATA).

Las baterías DataSafe HX son la fuente de energía ideal para proteger sistemas vitales y críticos que incorporan características de diseño seleccionadas que maximizan la confiabilidad al ...

EnerSys UPS Batteries, DataSafe HX 12V, are valve regulated lead acid batteries that have been designed to offer superior solutions for the UPS, IT and Telecom (select models) markets which demand the highest levels of security and ...

Las baterías DataSafe HX son la fuente de energía ideal para proteger sistemas vitales y críticos que incorporan características de diseño seleccionadas que maximizan la confiabilidad al tiempo que garantizan un rendimiento superior y una excelente vida útil. Industrias: Data Center, Solares, Telecomunicaciones, UPS, UPS Industriales

DataSafe HX Batteries. Featuring Valve Regulated Lead Acid (VRLA) technology, DataSafe HX batteries offer superior solutions for a range of Uninterruptible Power Supply (UPS) and IT applications. The batteries combine several select design features to maximize reliability and service life while ensuring high power, low maintenance performance.

This unique battery combines the power of 12V with a low level of gas evolution, earning its approval for air freight applications. The EnerSys 12HX300 DataSafe Battery meets UL safety standards and is suitable for use in offices, cabinets, ...

DataSafe With the growth of integrated networks and systems, dependence on continuous power has never been more critical. As the global leader in stored energy solutions for industrial applications, EnerSys provides a wide range ...

The DataSafe XE series of TPPL technology EnerSys units provide a range of features and benefits that make them the ideal choice for your modern critical UPS systems. These batteries are smaller, lighter, able to handle multiple hits, and consume less energy than their conventional counterparts while providing longer life and higher reliability.

This unique battery combines the power of 12V with a low level of gas evolution, earning its approval for air freight applications. The EnerSys 12HX300 DataSafe Battery meets UL safety standards and is suitable for use in offices, cabinets, and near other equipment.
