

What is happening in Liberia's energy sector?

The update highlights key advancements in Liberia's energy sector, including notable progress in power generation and the expansion of energy access. However, despite these gains, the country faces significant power shortages, calling for substantial investments to achieve reliable, affordable, and sustainable energy access for all Liberians.

Why is reliable energy important in Liberia?

The report offers a comprehensive analysis of recent economic developments in Liberia, underscoring the crucial role of reliable energy in fostering sustainable growth. The update highlights key advancements in Liberia's energy sector, including notable progress in power generation and the expansion of energy access.

How will Liberia achieve universal access to electricity by 2030?

The country will need to invest heavily in energy infrastructure to achieve universal access to electricity by 2030. The primary energy sources in Liberia are traditional biomass fuels such as firewood and charcoal, which account for more than 80 % of the country's total energy consumption [5,12,13].

What are the challenges to energy access in Liberia?

The primary challenge to energy access in Liberia is the limited and underdeveloped energy infrastructure. The lack of adequate power generation, transmission, and distribution systems contributes to this low access rate. The electrification rate is significantly lower in rural areas, where most of the population resides.

What are the opportunities for energy access in Liberia?

Additionally, adopting off-grid and mini-grid solutions presents another opportunity for energy access in Liberia. Given the challenges of extending the central grid to remote areas, off-grid and mini-grid systems offer cost-effective alternatives. Some of the energy sources utilized in Liberia are summarized in Table 3. Table 3.

Will Liberia get a 20 MW power supply in 2020?

In addition, the government signed a Power Purchase Agreement with a solar energy company to provide the country ≥ 20 MW of electricity in 2020. Despite these efforts, much work remains to be done to improve access to reliable and affordable energy in Liberia.
