Will AMEA power build a solar photovoltaic plant in Djibouti?

Emirati independent power producer (IPP) AMEA Power has signed agreements to build a solar photovoltaic plant in Djibouti. With a capacity of 30 MWp, the construction of the solar plant will be done in the framework of a public-private partnership (PPP).

Why is Djibouti constructing a solar farm?

Djibouti's \$390 million solar farm is under construction in southern Djibouti as a result of a public-private partnership between Djibouti's Ministry of Energy and Natural Resources and Green Enesys, a German renewable energy firm. Construction began in 2018 after \$50 million in funding was secured by the World Bank and other financiers.

What is a power purchase agreement (PPA) in Djibouti?

AMEA Power has secured a power purchase agreement (PPA) for a 25 MW solar-plus-storage project in Djibouti. It will be the country's first independent power producer (IPP) project and is now in development under a build-own-operate and transfer (BOOT) framework.

Where does Djibouti's energy come from?

Most of Djibouti's energy supply, around 80%, is sourced from neighboring Ethiopia. At the end of 2023, Djibouti was among the select few countries throughout the world that had yet to install any PV capacity, according to the International Renewable Energy Agency (IRENA).

Will AMEA Power Invest in Djibouti's first IPP project?

The solar plant is the country's first IPP project and will be developed under a BOOT model. "The Sovereign Fund of Djibouti (FSD) will be joining the project before financial close as a minority shareholder," AMEA Power said, without providing additional details.

What does AMEA power do in Djibouti?

AMEA Power will develop the project in partnership with the Sovereign Wealth Fund of Djibouti (FSD). The electricity produced will be sold to Djibouti's public utility, Électricité de Djibouti (EDD), under a long-term power purchase agreement.
