

Drax power ltd Mali

Who uses Drax power?

Drax supplies renewable source power to over 165,000 businesses and organisations across the UK, including electricity from Drax Power Station. We provide and manage electricity for large industrial and commercial sector customers from our offices in Northampton and Ipswich. Opus Energy

What is Drax Power Station?

It is the most advanced and efficient coal-fired power station ever built in the UK. Drax Power Station is officially opened with three generators and a total electrical capacity of just under 2 gigawatts (GW). It has the capability to power around two million homes.

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

Why is Drax the UK's largest power station?

Drax doubles in size and capacity to just under 4 GW, becoming the largest power station in the UK. Drax becomes the first power station to invest in retrofitted flue gas desulphurisation (FGD) equipment. Once fully operational in 1995, it removes 90% of sulphur dioxide emissions, making it the cleanest coal-fired power station in the UK.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for £1.87 billion (US\$3 billion).

When does Drax Power Station start generating electricity?

The Selby coalfield is discovered and the Central Electricity Generating Board begins building Drax Power Station to use its coal. Two other recently-built coal power stations, Ferrybridge C and Eggborough, begin generating electricity. Drax Power Station begins generating electricity after its first 660MW unit is commissioned.

Drax Group plc, trading as Drax, is a power generation business. The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business.

Drax Power Station completes a five-year, £100 million plus project - the largest steam turbine
