

## Electric distribution Guinea-Bissau

system

How sustainable is the electricity sector in Guinea Bissau?

The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable service delivery.

Does Guinea-Bissau have electricity?

Guinea-Bissau has one of the lowest electrification rates in Sub-Saharan Africa with only 29 percent2 of the population -around 53 percent in urban areas- having access to electricity(Figure 1).

How much money is needed to achieve universal electricity access in Guinea Bissau?

8. Around US\$263 millionof public and private funding will be needed to achieve universal electricity access in Guinea Bissau by 2030. To achieve this goal, a combination of grid (70%) and off-grid (30%) solutions will be required to bring 400,000 additional new connections18.

Will ECOWAS OMVG boost electricity access in Guinea-Bissau?

The associated ECOWAS regional access project will boost electricity access in Guinea-Bissau to 39 percent16. The OMVG will have around 300 km of a 225 kV transmission line in Guinea Bissau, and four high-voltage 225/30 kV substations (Mansoa, Bissau, Bambadinca and Saltinho).

How will solar power work in Bissau & Gabu?

In Bissau,solar photovoltaic (PV) plants will help reduce the average cost of electricity in the country and diversify the energy mix,while battery storage will help integrate this variable energy source into the grid. In Bafata,Gabu and Cacheu,the PV plants will provide cheaper and cleaner local power generationthan current diesel production.

How will the ECOWAS regional Access Project Impact Guinea-Bissau?

The ECOWAS regional access project will extend and strengthen the distribution networkin Guinea-Bissau from the planned four high-voltage substations, and supply electricity to 198,000 additional people (33,000 households) by 2022. A low-hanging fruit opportunity to bring electricity to additional 31,443 households exists.17 8.

The Electricity Distribution System Development Project in the City of Bissau (PDSDE) is part of the Electricity Sub-Sector Investment and Capacity Building Program of Guinea Bissau. This Program which is under the country's 2015-2020 Strategic and Operational Plan aims to improve the distribution and increase people's access to quality ...

In the energy sector, the strategy will strengthen the distribution network to improve access to electricity for most of the population. The bank will continue implementing the Bissau City Power Supply Improvement
