

Headquartered in Vienna, ENERGIEALLIANZ Austria supplies electricity and energy-related services to about 121.000 customer facilities in the segment of key account, industrial and business customers. ENERGIEALLIANZ Austria trades in electricity, CO 2 certificates and guarantees of origin all across Europe.

As the largest energy sales enterprise in Austria, EAA supplies 2.8 million customers - from private households to businesses and industrial facilities - with electricity, natural gas, and energy-related services both in Austria and abroad. Moreover, EAA Energy Trading not only forms the central interface between production, sales, and the ...

Die Energieallianz Austria GmbH ist ein österreichisches Energievertriebs- und Handelsunternehmen. Es entstand 2001 im Zuge der Liberalisierung der Energieversorgung aus den Vertriebsaktivitäten der ostösterreichischen Landesenergieversorger EVN, Wien Energie sowie der Burgenland Energie. Die EAA verkauft Strom und Erdgas in Österreich und ...

The EAA Group is Austria's leading energy distributor and supplies 2.8 million customers - from private households to commercial and industrial enterprises in Austria and abroad - with electricity, natural gas, and related services.

The possibility of establishing energy communities is a central part of this. Energy communities represent a new milestone for the Austrian energy industry. They enable proactive participation in the energy transition, promote the expansion of decentralised energy systems, offer economic incentives and strengthen regional value chains.

Austria is supplied with 34% of its energy from renewable sources and 66% from fossil fuels. The 3rd of May is the day until which we can supply ourselves with energy from renewable resources this year in purely mathematical terms. For the rest of the year, Austria is dependent on fossil fuels such as coal, oil and natural gas.
