Engie has been hired by Guam's state electricity utility to build two solar-plus-storage plants with a combined capacity of 50MWp/300MWh on the Micronesian island. The firm scooped up the project duo in the third round of Guam's competitive renewable tender programme after submitting the lowest bid.

The solar-plus-storage facility is planned to commence operation by December 2021. Its power contract, signed with the Guam Power Authority (GPA), will bring around USD 340 million (EUR 314.4m) in revenue over the 25-year term, KEPCO said.

The Guam Power Authority, in the Western Pacific, approved Engie as a successful bidder to build two solar-plus-storage projects under a 20-year power purchase agreement, with a view to formalizing the deal with a contract to the France-based firm.

The Guam Power Authority has unveiled its system for storing energy generated by solar panels, which officials said will help balance energy demand with production. The battery energy storage system includes a 24-megawatt Hag#229;t#241;a substation and a 16-megawatt Talofof substation .

Energy-Storage.news also reported today on a partnership between thermal energy storage technology developer Azelio and Mexico-based industrial equipment supplier and turnkey project developer CITRUS. Azelio ...

Organizations that have experienced intermittent power outages in Guam may see hope in sight. Guam Power Authority (GPA) will install two energy storage systems to help reduce intermittent power outages that Guam has been experiencing.
