

Energy storage summit central eastern europe Pitcairn Islands

What is Energy Storage Summit Central Eastern Europe?

The first edition Energy Storage Summit Central Eastern Europe was an event full of life, excitement, and promise. With the entire industry facing unprecedented growth as never seen before, one of the main aims of our Summit was to bring together market experts in the region to signpost the next chapter for energy storage in Central Eastern Europe.

Why should you attend the Energy Storage Summit Central Eastern Europe?

With the energy storage industry facing unprecedented growth across the globe, we hope you were able to attend our inaugural Energy Storage Summit Central Eastern Europe in Warsaw, Poland. At the Summit we highlighted the opportunities, challenges and lessons learnt across various countries as the region readies itself for energy storage.

What is the Energy Storage Summit?

Our Summit aims to highlight the fundamental role that energy storage will play in this journey, and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead. One scenario estimates Europe will reach 29.6 GWh of installed capacity by the end of 2024, marking a 72% increase YoY.

Why should you attend the Energy Storage Summit?

Over the past ten years, the Summit has gained recognition as the biggest, busiest, most informative, and best networking event in the European energy storage sector, where deals are made on site; generating efficient business for everyone who attends. workshops, an after-party, private networking dinners and much more!

How much energy storage does the EU need?

Over the next five years, the EU needs to achieve a mammoth 187 GW total installed storage capacity to keep on track. Of the 5GW currently under construction in GB, 3.5GW of this is set to come online in 2024 with pipelines continuing to expand into 2025. These are just some examples of the urgent need for energy storage deployment across Europe.

How will a new battery energy storage system help Kosovo?

Following the announcement in 2022 that Kosovo was going to begin building its first battery energy storage systems (170MW/340MWh), this will provide relief to the energy crisis by stabilising the fluctuating frequency of electricity and help integrate other renewable assets onto the grid.
