The BESS Failure Incident Database [1] was initiated in 2021 as part of a wider suite of BESS safety research after the concentration of lithium ion BESS fires in South Korea and the Surprise, AZ, incident in the US. The database was ...

Dielectrics Dielectric capacitors are vital components of electronics and power systems. The thin-film materials of which capacitors are composed are usually optimized by changing the material composition. However, Kim et al. found that postprocessing an already effective thin-film dielectric by high-energy ion bombardment further improved the material because of the introduction of ...

A novel dual priority strategy is proposed to improve pulse energy storage properties of $(\text{Ba}_{0.98-x}\text{Li}_{0.02}\text{La}_x)(\text{Mg}_{0.04}\text{Ti}_{0.96})\text{O}_3$ ceramics.. High current density of 2786.4 A/cm² and power density of 321.6 MW/cm³ are achieved at $x = 0.04$.. High discharge energy density of 3.98 J/cm³ and ultrafast discharge rate of 221 ns are obtained at $x = 0.04$
