energy storage. Assembly Bill 2514 (Skinner, Chapter 469, 2010) has mandated procuring 1.325 gigawatts (GW) of energy storage by IOUs and publicly-owned utilities by 2020. However, there is a notable lack of commercially viable energy storage solutions to fulfill the emerging market for utility scale use.

Storage capacity is the amount of energy extracted from an energy storage device or system; usually measured in joules or kilowatt-hours and their multiples, it may be given in number of hours of electricity production at power plant nameplate capacity; when storage is of primary type (i.e., thermal or pumped-water), output is sourced only with ...
