

Who is ZPA smart energy?

We manufacture complex electrical engineering products with an innovative approach to modern technology. 70 years of supplying measuring and control equipment to the global power industry market, 70 years of development, 70 years of experience! All this is reflected in the quality of ZPA Smart Energy products. We keep moving onward!

How much electricity does Eritrea have?

It is also working towards raising the share of electricity generation from renewable energy. According to the 2019 World Bank Global Electrification Database, 50.3 per cent of Eritreans have access to electricity, with electrification reaching 75.6 per cent and 36.6 per cent of the urban and rural population, respectively.

What are ZPA smart meters?

ZPA smart meters are designed according to the global standards that define the communication interface for the distributor and third parties. The parameterisation infrared interface (DSMR P0) according to IEC 62056-21 is the absolute necessary basis for all meters in our portfolio. The key interface is towards the distributor (DSMR P2).

Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.

What is Eritrea's Nationally Determined Contribution (NDC)?

From fossil fuels to renewables Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission and distribution losses. It also encourages environmentally sound technologies to reduce greenhouse gas emissions.

Why is energy transition important in Eritrea?

Consequently, Eritrea's energy transition should be informed by multidimensional pathways that respond to diverse realities and are critical to sustaining implementation and adaptability. The world is at the tipping point for bolder steps and immediate aggressive actions.

Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission...

Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission and distribution

losses. It also ...

Algorithms in the smart meter and RTUs in transformer stations can resolve the optimisation tasks in a coordinated manner for a wide range of entities operating in the electricity market. This not only gives the distributor an efficient tool to regulate the regional part of the grid or the island, but also a tool to implement new business ...

ZPA Smart Energy was founded back in 1958 in Trutnov, East Bohemia. Here, the majority of our production capacity is concentrated. We apply our long-term experience in production and development activities, which we enrich with the ...

Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission and distribution losses. It also encourages environmentally sound technologies to reduce greenhouse gas emissions.

ZPA Smart Energy was founded back in 1958 in Trutnov, East Bohemia. Here, the majority of our production capacity is concentrated. We apply our long-term experience in production and development activities, which we enrich with the latest modern knowledge.

ZPA Smart Energy is a leading Czech manufacturer of electricity meters and load control devices. Thanks to acquired knowledge, modern development centre and conscientious partners, they are able to produce products according to the specific needs of clients.
