

Esasolar energy system sl Bulgaria

What does esasolar do?

Design, manufacture and supply of trackers and fixed solar structures. ESAsolar contributes to the development and efficiency of photovoltaic energy throughout the world, providing tailor-made solutions to promoters and developers of photovoltaic installations and transferring knowledge to the communities where it operates. 01.

How does esasolar contribute to the development and efficiency of photovoltaic energy?

ESAsolar contributes to the development and efficiency of photovoltaic energy throughout the world, providing tailor-made solutions to promoters and developers of photovoltaic installations and transferring knowledge to the communities where it operates. 01. EXTENSIVE EXPERIENCE IN THE SUPPLY OF PHOTOVOLTAIC STRUCTURES 02.

What solutions does esasolar offer for photovoltaic plants?

ESAsolar offers two range of solutions for photovoltaic plants: fixed structures and solar trackers. We work, in close collaboration with our clients, in the execution of large photovoltaic parks, offering maximum customization during each phase of the project to achieve the maximum effectiveness and efficiency of the product.

What makes esasolar unique?

ESASolar is characterized by its vocation for research and innovation of our products. In our prototype plant we test all those improvements and innovations in the development of our products prior to their launch into the market.
