

Evo power unit Estonia

Who is Evo power?

EVO Power is a leader in energy storage technology and innovation that enables the electrification of large commercial and small utility projects with fully integrated energy storage solutions. Our turnkey Battery Energy Storage System (BESS) and software solutions enable our clients to contribute to market trading and grid services.

Who sells electricity in Estonia?

In Estonia's electricity market, Eesti Energia is the largest seller with a 60% market share and owns the largest distribution network, representing 86% of the distribution market. The Estonian Competition Authority (ECA) regulates transmission and distribution rates, as well as connection charges. Electricity in 2020:

How much energy does Estonia use?

Estonia's all-time peak consumption is 1591 MW (in 2021). In 2021 the electricity generated from renewable energy sources was 29.3 %, being 38% of the share of renewable energy in gross final energy consumption. Oil-based fuels, including oil shale and fuel oils, accounted for about 80% of domestic production in 2016.

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale-fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

Will Estonia's first green hydrogen production unit be built in Tallinn?

Estonia's largest renewable energy producer, Utilitas, will build Estonia's first green hydrogen production unit in Tallinn by the end of next year. In addition, the Environmental Investment Centre (EIC) decided to support the expansion of the first production unit, which will be ready in 2026 and double its capacity.

Why is Estonia a hub of electricity?

Estonia's grid is an important hub as it is connected to Finland in the north, Russia in the east, Latvia and Lithuania in the south. Electricity is traded on the Nordic power market Nord Pool. In 2014-2016, yearly net imports from Finland were equal to 31-67% of consumption.
