

Who is exawatt?

Sheffield-based Exawatt has an intricate understanding of the technology, manufacturing and materials behind critical technologies relating to decarbonisation through electrification, from battery energy storage systems (BESS) to electric vehicle powertrains, to solar cells and modules.

What happened to exawatt?

In 2023, Exawatt was acquired by CRU, a commodity intelligence company that provides in-depth market analysis on commodities enhancing our material inputs, costs and technology forecasts. Talk to our team

How does exawatt work?

In each case, Exawatt takes a similar analytical approach, with a focus on mapping and modelling supply chains back to their sources and developing accurate manufacturing cost and performance models that allow us to forecast "should costs" for each technology with a high degree of accuracy.

How many employees does exawatt have?

With this acquisition, Exawatt's team will be fully retained, meaning CRU will employ more than 380 team members in 15 locations across the world, now including Exawatt's headquarters in Sheffield, CRU's second hub in the United Kingdom. About Exawatt
