

What is the Falkland Islands Environment Strategy 2021 - 2040?

The Falkland Islands Government is proud to launch its flagship Environment Strategy 2021 - 2040, which recognises the central and universal role that the natural environment plays in the sustainable development of our health and wellbeing, our economy and our nation as a whole.

Does the Falklands need a new wind farm?

But the Falklands feel it is not enough and besides the current wind farm is reaching its renewal date. No wonder then that notice has been given of the planning applications submitted for the Farm Expansion of Sand Bay Wind Farm to include 3 by E70 Enercon wind energy converters and battery storage. FIG and c/o Glenn figure as the applicant.

Why is the environment important in the Falkland Islands?

The environment is essential for human existence. We rely on our ecosystems to provide us with clean water, air, food and shelter. In the Falkland Islands, the foundations of our livelihoods are reliant on our environment - our key sectors would not exist without our natural resources.

Where can I find a plan for the Falkland Islands?

FIG and c/o Glenn figure as the applicant. The plans and details can be viewed at the Planning Office, Secretariat, Stanley and on the Falkland Islands Government Planning & Building Services Facebook page. Anyone wishing to comment on these applications must do so in writing, to the Planning Officer, by 2 February 2024.

Following approval from the Executive Council on Monday 27 November, the Falkland Islands Government will be able to proceed with "in principle approval" for Phase Three of the Sand Bay Wind Farm.

The Falkland Islands archipelago is made up of more than 700 islands and has a hugely varied coastline from rugged coastal cliffs to miles and miles of undisturbed, white sandy beaches. Some of the islands are habited and many welcome day and overnight visitors.

Jane Cameron was born in the Falkland Islands in 1950. She returned to the Islands in 1989, after living in the United Kingdom where she studied, to take up the newly-created post of Government Archivist. Jane's brother, Donald, said that Jane's work started with a mountain of cardboard boxes filled with dusty historic documents stored in ...

Falkland Islands: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

This has meant that 90% of households in Camp use energy derived from wind and solar power, while 35% of Stanley's energy comes from wind power, mainly three eolic turbines at Sand Bay.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).
