Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Are the Faroe Islands a sustainable country?

Did you know that the Faroe Islands is one of the world's leading nations in producing sustainable electricity with over 50% of the nation's electricity deriving from renewable energy sources? There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

How is energy produced in the Faroe Islands?

In the Faroe Islands, energy is produced primarily from hydro and wind power, with oil products being the main energy source. Mostly consumed by fishing vessels and sea transport.
