

Will Morocco double green electricity production in Western Sahara?

(Bloomberg) -- Morocco, buoyed by recent foreign recognition of its rule over Western Sahara, plans to double green electricity production in the disputed territory to meet growing demand before it co-hosts the 2030 FIFA World Cup.

What is Western Sahara's green power capacity?

Western Sahara's current green power capacity is about 1.3 gigawatts, or about a quarter of the nation's total renewables capacity. A project to develop a 3-gigawatt cable linking renewable plants in the territory to central Morocco has attracted interest from private investors, said the official.

Does Morocco have a green energy plan?

But recent statements of support from France, Spain and the US have encouraged Morocco to step up investments in energy infrastructure and agriculture, among other areas. Western Sahara's current green power capacity is about 1.3 gigawatts, or about a quarter of the nation's total renewables capacity.
