

Who is Rimac energy?

One of Rimac's slides shown during its presentation at Energy Storage Summit Central Eastern Europe (CEE). Image: Cameron Murray /Solar Media. Rimac Energy, the battery energy storage system (BESS) division of EV supercar company Rimac Automobili, has unveiled its new product at the Energy Storage Summit Central Eastern Europe (CEE).

What is sinestack?

We deployed a novel electrical architecture to create SineStack - a fully integrated BESS that offers exceptional efficiency, lifetime, and redundancy, all within a class-leading compact footprint.

Are Rimac energy specifications guaranteed?

Note: Specifications in the above table are design estimates only and are not guaranteed. Contact Rimac Energy for project-specific data as final values depend on system design, location, and use case.

Why should you choose sinestack over-the-air control software?

Over-the-air parameter updates allow the control software to adjust operating conditions, ensuring maximum energy. SineStack guarantees a cost-effective and simplified expansion. Featuring a usable capacity of 790 kWh and a 400 kVA output (400 Vac 3-ph), it's modular and scalable, offering unmatched flexibility.

What makes Rimac energy standout?

"What makes Rimac Energy stand out, is the emphasis on fostering an open and supportive work environment, where everyone feels welcome and valued. I appreciate that we prioritize creating a clear sense of higher purpose, which helps everyone understand the bigger picture and work towards a common goal."

How much does a Rimac Supercar cost?

We then ask Laublaettner what Rimac's approach to pricing will be. Its parent company's Nevera supercar retails for around EUR2 million (US\$2.2 million), 30-40x the average price of a new electric vehicle (EV). Laublaettner is clear that the ESS market requires a vastly different approach.

SineStack is a fully integrated 2-hour AC block with an 868kWh energy capacity, delivering 3-phase power at 400Vac directly from the cabinet. Designed for utility-scale and commercial & industrial applications, it offers a significant reduction ...

Rimac Energy announced its plans to enter the ESS market in Spring 2023 and first presented its SineStack battery energy storage system (BESS) product at our publisher Solar Media's Energy Storage Summit ...

The unit, called SineStack, is a lithium iron phosphate (LFP) cell-based modular BESS solution with an energy storage capacity of 790kWh and a 400kVa output. ... in the industry." Rimac plans to start producing

# Fiji rimac sinestack

its ...
