Why should you choose solar Fiji?

As an official partner of Victron Energy, our quality solar products and services are designed to maximize the longevity of your system, providing energy efficiency and cost savings for the long term. If you're looking for a reliable and experienced renewable energy service provider in the South Pacific, look no further than Solar Fiji.

How much does solar PV cost in Fiji?

Solar PV has many advantages such as it has no moving parts and therefore does not require extensive operation and maintenance; solar resource is free and abundant at most locations in Fiji. For Fiji, the current installation cost of rooftop solar PV grid connected system is around 3100-3500 FJD/kW.

Does Fiji have solar power?

According to the annual reports of Energy Fiji Limited (EFL), there has been some solar electricity generated from 1998 to 2007 by solar PV system that was commissioned in November 1997 (FEA 2016). In 1998, this system generated around 12 MWh of electricity and was doing well for almost 6 years.

How many solar panels are installed in Fiji?

In total, around 4 MW of solar PV is installed with some grid-connected solar systems planned and many off-grid solar systems planned by Fiji Department of Energy with funding from Fijian government and overseas donor agencies.

Where can land based solar installations be done in Fiji?

Hence, considering the large land area in Viti Levu and Vanua Levu, land based solar installations can be done near locations with demand depending on the solar resource and land availability for installations. Photovoltaic power potential in Fiji. (Source: WBG 2016)

What is the largest solar PV system in Fiji?

The largest system to date is Six Senses Fiji Resort on Malolo Islands in the Mamanuca Group that has a 1 MW solar PV system with 4 MWh of Lithium ion battery storage system (SEANZ 2017).

The survey indicated a robust interest in solar energy solutions, with nearly 70 percent of households expressing a willingness to invest using their own finances. Additionally, 50 percent showed interest in financing options such as loans or subscription models for solar systems.

Fiji is embarking on a project to bring solar power to its remote islands. It starts by creating tenders for mini-grid construction, and employing tools to customize energy systems for each community ensuring each community's needs are met. The project is building bridges with local communities and has received very positive feedback.

Solar Fiji is proud to partner with the Australia Infrastructure Financing Facility for the Pacific (AIFFP) to deliver affordable and sustainable solar energy solutions across Fiji. This collaboration combines Solar Fiji's expertise in renewable energy with AIFFP's support through concessional financing and grants, enabling greater access to ...

Fiji is embarking on a project to bring solar power to its remote islands. It starts by creating tenders for mini-grid construction, and employing tools to customize energy systems for each community ensuring each ...

Solar PV application for electricity generation is the cheapest for Fiji in order to reduce its emissions as the unit cost of solar PV module has significantly reduced in the recent past.

The survey indicated a robust interest in solar energy solutions, with nearly 70 percent of households expressing a willingness to invest using their own finances. Additionally, 50 ...

A significant number of Fijians have expressed willingness to invest in solar systems, as the government strives to achieve 100 percent use of renewable energy by 2036. This was revealed in a survey to understand the demand for solar energy among people and businesses, jointly conducted by Solar HUB Fiji and the Australian Government's Market ...

Solar Fiji specialize in the engineering, supply & installation of grid connect and off grid power systems. Official Distributor & Service Partner of Victron Energy. We draw on decades of experience in the solar industry and a track record of successfully deploying over 20MWp of solar projects in Australia and the South Pacific.

Fiji has reached approximately 60 percent of its renewable energy targets, mainly through hydroelectric power, but will require about \$4 billion to achieve full renewable energy by 2036.

Fiji has made significant progress towards its renewable energy goals, achieving approximately 60 percent of its targets, primarily through hydroelectric power. However, the nation requires ...

Solar Fiji is proud to partner with the Australia Infrastructure Financing Facility for the Pacific (AIFFP) to deliver affordable and sustainable solar energy solutions across Fiji. This ...

Fiji has made significant progress towards its renewable energy goals, achieving approximately 60 percent of its targets, primarily through hydroelectric power. However, the nation requires an estimated \$4 billion from 2024 to 2036 to reach 100 percent renewable energy.

Solar PV application for electricity generation is the cheapest for Fiji in order to reduce its emissions as the unit cost of solar PV module has significantly reduced in the recent ...
