International Conference Energy & Meteorology, Padova 27-29 June, 2023

Whether you choose to decipher the constellations or prefer to lose yourself in the twinkling dance of a starry, starry night, a journey with Paul Gauguin Cruises takes you into the heart of French Polynesia wrapped each night in a blanket of celestial wonder.

Flying into the stratosphere at 38,000-45,000 feet put SOFIA above 99 percent of Earth's infrared-blocking atmosphere, allowing astronomers to study the solar system and beyond in ways that are not possible with ground-based telescopes.

Flying into the stratosphere at 38,000-45,000 feet put SOFIA above 99 percent of Earth's infrared-blocking atmosphere, allowing astronomers to study the solar system and beyond in ways that are not possible with ...

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).
