

Who is greenvolt group?

Greenvolt Group is committed to decentralized energy production through individual and collective self-consumption solutions. This is one of the main pillars of the energy transition and an effective way to reduce energy costs, particularly for businesses. We are shaped by nature, led by knowledge and backed up by true green expertise.

Who owns green volt?

Green Volt is 50% owned by Flotation Energy and 50% by Vårgrønn. When completed, Green Volt will provide up to 560 MW of renewable energy capacity. The project will deliver electricity to oil and gas platforms, replacing power currently generated by gas and diesel turbines. Green Volt will also provide electricity to the UK grid.

What is greenvolt?

Greenvolt operates in the renewable energies market. We were born green, not made green. By valuing forestry and agroforestry resources and taking advantage of the sun and wind, we provide green and renewable energy.

How many GW does greenvolt group have?

It has a pipeline of 8.4 GW, of which 2.9 GW are sold assets or at least Ready to Build. Greenvolt Group is committed to decentralized energy production through individual and collective self-consumption solutions. This is one of the main pillars of the energy transition and an effective way to reduce energy costs, particularly for businesses.

Will green volt be the first offshore windfarm in Europe?

With onshore consent announced earlier this month, Green Volt has now received all its planning approvals and remains on track to be the first commercial-scale offshore windfarm in Europe. When completed, Green Volt will include up to 35 floating wind turbines, providing up to 560 MW of renewable energy capacity.
