

Why did Vattenfall sell its offshore wind zone to RWE?

In December 2023, Vattenfall agreed to sell its Norfolk, UK, offshore wind zone to RWE for an enterprise value of £963m (\$1.2bn). The transaction enables the continued development of three wind farms with a combined capacity of 4.2GW, sufficient to power four million British homes.

How much Bess will France have in 2023?

France had just under 900MW/900MWh of BESS online by the end of 2023 according to data from LCP Delta, and should deploy around 300MW a year over the next few years.

Which Nordic countries are deploying Bess batteries in 2024?

BESS deployments in the Nordics. Source: LCP Delta STOREtrack. Sweden, however, has both a more developed residential storage sector and a bigger pipeline of grid-scale batteries than the rest of the Nordic countries put together, with around 400MW announced for operations in 2024 alone.

While Norway once aimed to be the "battery of Europe" it has since been overtaken by other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's ...

Nimbus will automate key trading processes across SMS" battery energy storage system (BESS) portfolio which currently has an operational capacity of 240MW and a total exclusive pipeline of 860MW.

The battery energy storage system (BESS) is designed to store the excess energy produced by the sun and returns it back to the grid when needed. A grid output forecasting function enables ...

In December 2023, Vattenfall agreed to sell its Norfolk, UK, offshore wind zone to RWE for an enterprise value of £963m (\$1.2bn). The transaction enables the continued development of three wind farms with a ...

The European renewable energy IPP arm of Korean conglomerate Hanwha Group, Q Energy, has started building one of the largest battery energy storage system (BESS) projects in France. The 35MW/44MWh ...

Swedish state-owned energy company Vattenfall has commissioned a green hydrogen storage pilot facility within a 100GWh capacity cavern. ... rsted puts 300MW BESS at onshore substation for Hornsea 3 ...

Renewable energy firm OX2 has started work on the Bredhølla BESS (battery energy storage system) project in the village of the same name, in the southern county of Kronoberg, directly adjacent to a substation run by ...

Currently, the largest BESS project underway in Sweden is a 5MW system in Uppsala, which is being installed by utility Vattenfall. In megawatt terms, the project in Grum - which will be deployed by Alfen's local subsidiary ...

UK-based Harmony Energy has announced that it will commence construction on the Chevire battery project, France's largest battery energy storage system (BESS). The BESS facility will be equipped with Tesla ...

Many of the world's largest energy companies - TotalEnergies, RWE and Vattenfall, to name a few - are quickly getting on board as well. Vattenfall has recently invested significant effort into BESS development, ...
