

Will Greece have a pumped Energy Storage regulatory framework?

Investors may be wary ahead of publication of an energy storage regulatory framework in Greece this summer. With a total installed capacity of 680 MW (production) and 730 MW (pumping), Athens-headquartered Terna Energy says the Amphilochia pumped storage project will be Greece's largest grid connected energy storage investment.

What is the Greek energy storage tender?

The tender is part of the country's 1 GW energy storage auction program. The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program.

Does Greece need a third energy storage tender?

Greece's first energy storage tender took place last year. It awarded 12 energy storage projects, or 411,79 MW of capacity, with an average price of EUR49,748/MW per year. To conclude its energy storage auction program, Greece needs to run a third storage tender to account for the remainder of the program's 1 GW of capacity.

How many MW of new battery storage capacity does Greece have?

The Greek energy regulator has awarded 300 MW of new battery storage capacity in the nation's second energy storage tender, split among 11 projects. The tender is part of the country's 1 GW energy storage auction program. The projects range in size from 8,875 MW/17,75 MWh to 49,9 MW/100 MWh).

What is Greece's energy storage auction program?

Greece's energy storage auction program awards contracts-for-difference(CfD) over periods of 10 years. The submitted bids were capped at EUR115,000/MW per year, with the lowest successful bid set at EUR44,100/MW per year. The highest awarded CfD tariff was EUR49,917/MW per year.

Will a large scale energy storage facility boost Greece's independence?

If built, the large scale facility can boost Greece's independence from fossil fuels and the government's strategy for a coal-free electricity system by 2025. Investors may be wary ahead of publication of an energy storage regulatory framework in Greece this summer.

Mehr als Fasern im Blick: Fraunhofer LBF entwickelt anwendungsnahe Methoden zur Simulation von Kunststoffbauteilen; Weniger Emissionen im Schwerverkehr: Elektrisch angetriebener LKW-Trailer spart 20 Prozent CO2 ein ... Diese ...

The project "Hydro Pumped Storage Complex in Amfilochia" is the largest investment in energy storage in Greece. It is characterized as a Project of Common Interest, under the code name PCI 2.9, since October 2013
