

Greek lead-acid and lithium-ion battery manufacturer Sunlight Group Energy Storage Systems is set to more than double the production capacity of its lead-acid recycling plant in Komotini, northeastern Greece.

The advent of lithium ion batteries has brought a significant shift in the area of large format battery systems. Previously limited to heavy and bulky lead-acid storage batteries, large format ...

Our recycling plant was established in 2014 in Komotini, Greece. It is one of Europe's most advanced lead-acid battery recycling units. Discover more about Sunlight Group facilities here. ...

An additional EUR20m is being invested in the production of lithium-ion batteries, with the installation of three highly automated assembly lines for lithium modules and complete lithium battery systems, as well as one ...

Increase in production capacity to meet growing global battery demand for top-quality lithium products. Sunlight Group expands production of lithium-ion batteries with four highly automatic assembly lines from Manz AG, ...

On the occasion of National Energy Conservation Day 2021, BEE launched the S& L Programme for High-Energy Lithium-Ion Traction Battery Packs and Systems. Want to know more about ...

The new production lines procured by Sunlight feature cutting-edge automatic laser systems in which lithium-ion battery cells are welded into high-strength, state-of-the-art ...

Greek lead-acid and lithium-ion battery manufacturer Sunlight Group Energy Storage Systems is set to more than double the production capacity of its lead-acid recycling plant in Komotini, ...

An additional EUR20m is being invested in the production of lithium-ion batteries, with the installation of three highly automated assembly lines for lithium modules and complete ...

We constantly upgrade our facilities with investments in equipment, automated production, robotic systems, and assembly lines to expand Sunlight's production capacity in lead-acid and lithium ...

The new production lines procured by Sunlight feature cutting-edge automatic laser systems in which lithium-ion battery cells are welded into high-strength, state-of-the-art modules, ensuring maximum quality, durability, ...

The Greek government will provide EUR49.9 million towards the cost of Sunlight's planned lithium-ion R&

D center in Athens - with some likely to come from EU funds - after the ...

Lithium-Ion Battery System Cesab's in-house assembled energy solution From higher productivity to improved safety, here are just some of the ways you can transform your material handling ...

1 ??&#0183; Greece is getting four new battery energy storage systems (BESS) amounting to 105 MWh, ...  
Greece is getting four new battery energy storage systems (BESS) amounting to 105 ...

Sunlight is also setting up a prototype lithium ion battery cells production plant at its headquarters in Xanthi.  
Greek prime minister Kyriakos Mitsotakis praised Sunlight as a global leader in the energy sector when he ...
